**Feedback from Phase 1:**

"Is "Check Tool Detail" only a subtask for "Check Tool availability" ? User should able to click tools name to get tools detail in other places too, would it be better if you make it to be a separate task ?"

Please see the updated IFD based on the feedback:

Phase 2 IFD Updating | CS6400 _Fall 2017 | Team 008

- "Tool Description" and task "Get Tool Details" are added as a separate task so that can be called by other tasks;
- Add one extra "Reservation Summary & Confirmation" for "Make Reservation" task;
- Add one extra "Purchase Summary & Confirmation" for "Purchase Tool" task.

All these updating are also represented in the abstract code and SQL statement files.
